

GRU + GP Joint Training — Groundwater Level Forecasting Architecture

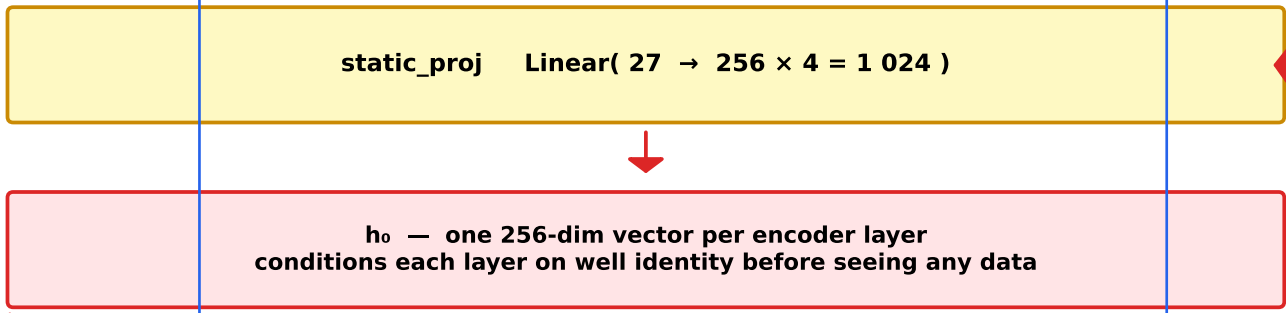

1 Data Preparation

2 Model Inputs (batch size B)

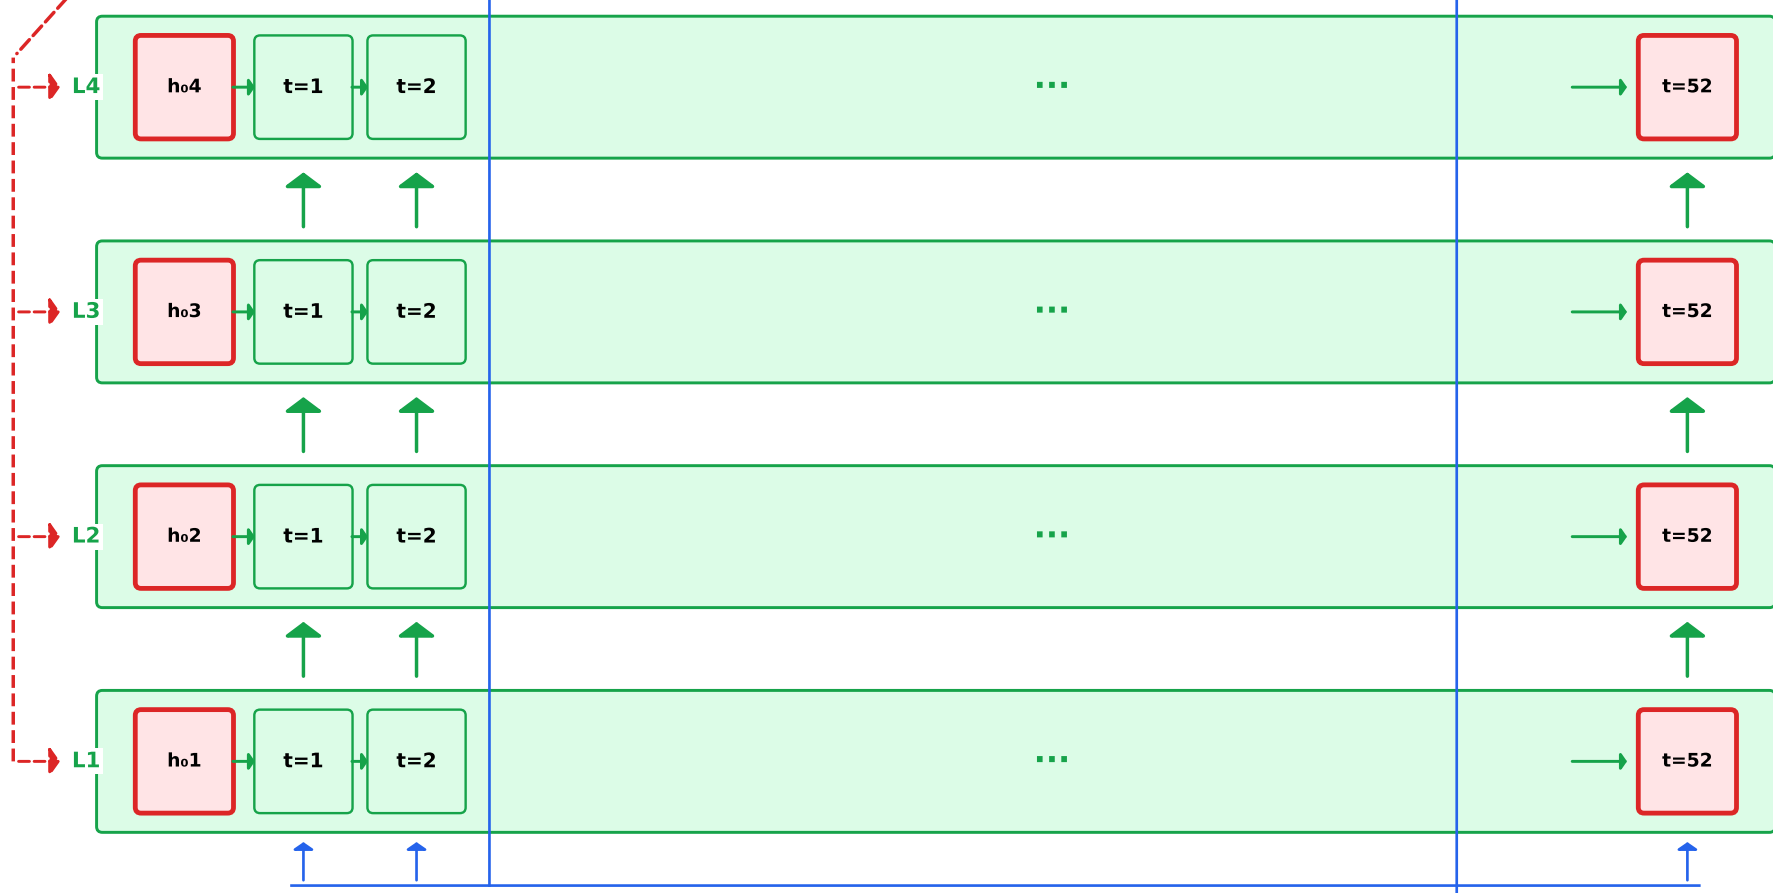

3 Static Projection → Encoder Initial State h₀

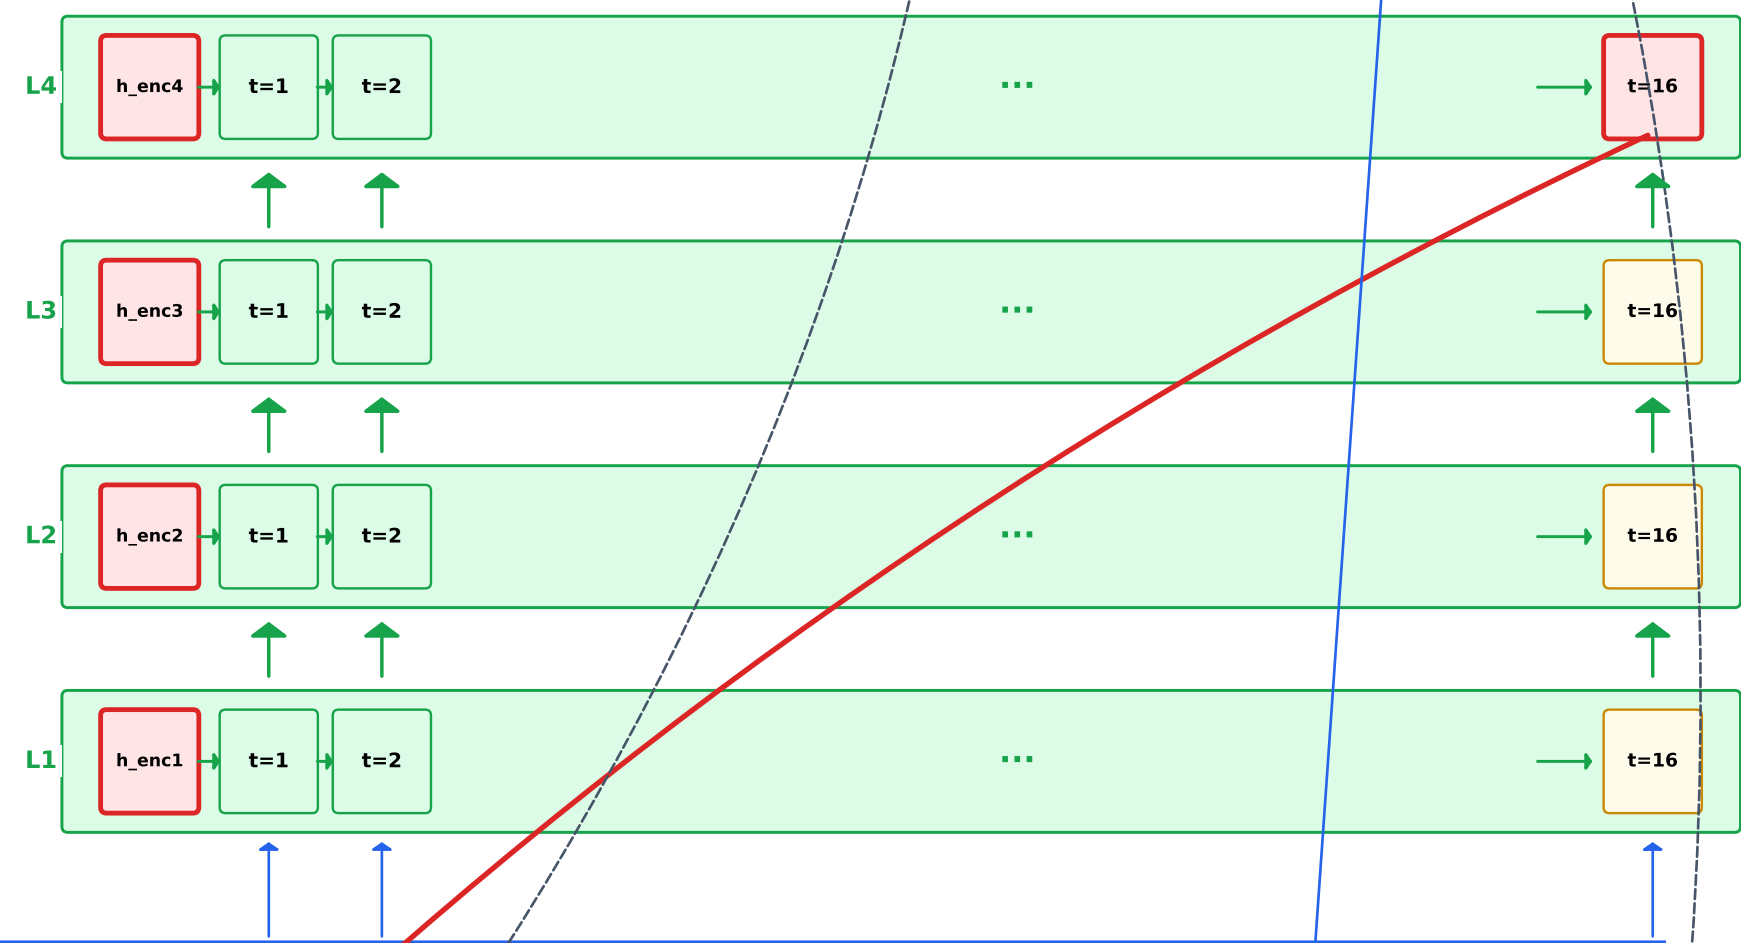

4 Encoder GRU (52 steps)

4 layers × 256 nodes · dropout 0.2

5 Decoder GRU (16 steps)

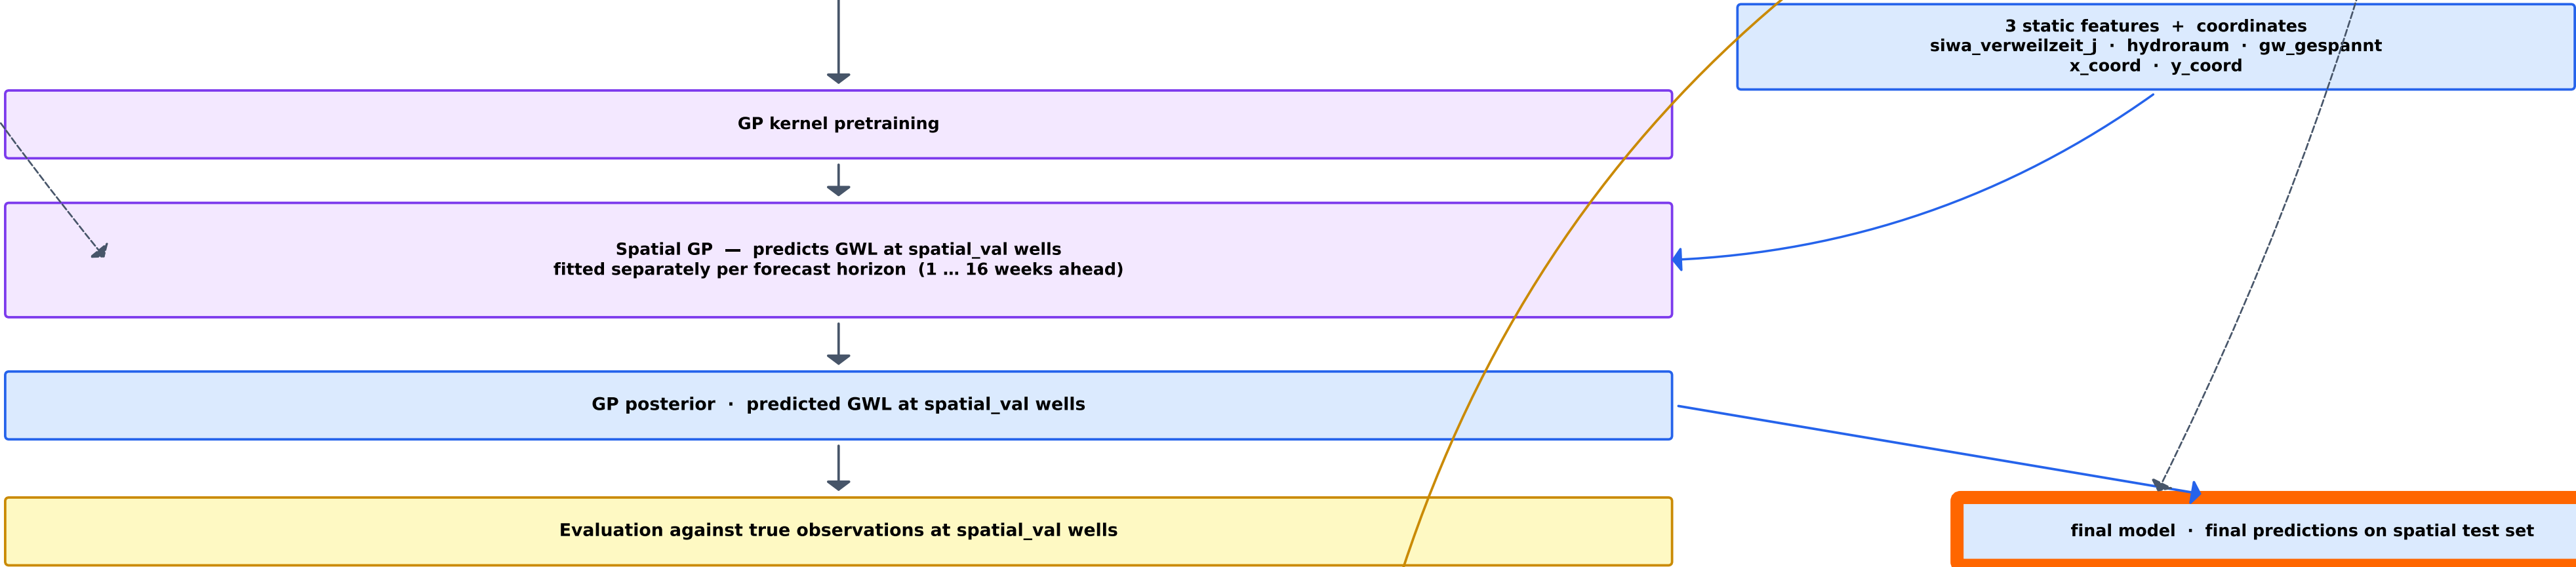

4 layers × 256 nodes · dropout 0.2

6 Output Head, Denormalisation & Saved Predictions

7 GP Spatial Interpolation

8 Joint Objective
